**Education**

Ph.D. Environmental Sciences, University of Virginia; B.S. Chemistry, University of Virginia

**Experience**

I have over 40 years of research experience in the U.S., Canada and Europe studying the hydrology and biogeochemistry of soils and natural waters. My research focuses on development of process-based ecosystem models for catchment soils, low-order streams and small lakes, and coastal and estuarine systems. I use these models for increasing scientific understanding and as tools for knowledge transfer and environmental decision-making. My background includes extensive laboratory and field experience in analytical chemical and instrumental techniques applied to the analysis of soils and natural waters. I've designed and implemented field experiments ranging from plot-scale, to hill-slope, to whole-catchment manipulations. My work has contributed to over 160 peer-reviewed papers which have been cited more than 7,000 times (h-index of 35) leading to recognition as an ISI Highly Cited Researcher in the two fields of Ecology/Environment and Engineering.

## Publication Highlights

Three peer-reviewed articles are published in Nature journals. Four peer-reviewed articles are in the top 1% of cited papers in their respective journals: 9th most cited in *Bioscience* (of 5,709); 14th and 33rd most cited in *Water Resources Research* (of 14,947); and 39th most cited in *Hydrology & Earth Systems Sciences* (of 4,131) (<https://incites.clarivate.com/#/explore/0/journal>; December, 2019). Named Highly Cited Researcher by the Institute for Scientific Information (ISI) in 2001 in the individual fields of Engineering and Ecology/Environment (<https://clarivate.com/webofsciencegroup/campaigns/highly-cited-researchers-2019-archive/>).
